

Plant Explorers (Sess. 1): Writing Prompt

Prompt: How would your daily life be different if you could make your own food, like a plant does? Re-write your journal entry, starting from what you would do when you woke up and end with yourself going to sleep.

Consider: Think about all the food you ate yesterday and how much of your day surrounded what you ate. What would you do with all that free time? Can your friends and family photosynthesize, too? How is this like a superpower? What food would you miss the most, if anything?
