# Queen Anne's Lace

by Dahlia-Rose, 826NYC

**TYPE**  
**INFORMATIONAL**  
**POETRY**  
**STEM**

*Lives with:* Eastern firefly & Actinomyces

*Latin name:* Daucus carota

*Description*

Queen Anne's Lace is around one to two feet tall, is hairy, and has a stiff stem. The plant has white flowers with a flat-top cluster of flowers.

*Lifespan*

Queen Anne's Lace lives two years.

*Season*

Queen Anne's Lace blooms in the summer.

*Reproduction*

The seeds from Queen Anne's Lace cling to animals and then fall off, so they are distributed.

*Physical traits*

She is tall and has blue eyes.

*Habitat*

Queen Anne's lace is found in dry fields, meadows,

and open areas.

### *Diet*

Queen Anne's lace eats minerals, sunlight, water, and oxygen.

### *Interesting facts*

Historians debate whether Queen Anne's was named after the Queen of Denmark or the Queen of Great Britain. Another interesting fact is that it is a carrot.

### *Life at home*

Moonstone thinks her baby brother and sister are sweet, and she loves her parents.

### *Personality traits*

This Queen Anne's Lace is bratty and obnoxious. Her name is Moonstone.

*Moonstone puts on her purple outfit and goes to school. She eats flowers for breakfast and waits for Miss Bee. At school, Moonstone sits by a bully. While she is talking, a boy sits on her, and she dies.*

*My name is Moonstone, and I am a  
Queen Anne's Lace. Today is the first  
day of sixth grade. I am so nervous I feel  
like my petals will fall off, but I am also*

*excited. I grabbed my plant holder and  
stuffed my plant holder. I made a quick liquid  
of pollen and ate it in five minutes flat,  
grabbed my lunch, hollered, “I am ready  
to be the best flower I can be!” and rushed  
to catch the plant bus. When I got there,  
my bus was about to leave, but the bus  
driver stopped, and I made it. I asked in disgust  
who were the new odd kids. “Rose, Dahlia,  
and Tulip,” Sunflower practically yelled.  
Man, I was mad; they caused me lots of  
trouble. The bus lurched to a stop. We  
are here, my dream school! We walked  
in, and I took a schedule with botany  
class, growing plants, learning about your  
surrounding, and how to talk to trees.  
The beginning of a new day.*
