**TYPE**  
**INFORMATIONAL**

Dear everyone,

This message is to help you be a pro at hide-and-seek.

1. Never hide where they can find you.
2. Hide where someone has never hidden before.
3. Move to places each time they check there, but don't get caught. For example: If someone checks in a bush, hide there when they're gone.
4. If somebody hides with you, kick them out so they move and get found.
5. If you play at night wear some clothes that are black or dark blue.
6. Never let anybody see you.
7. If you're it, look at places where you can find them.
8. Never be it. If you're it and everybody hides and you're playing in the dark you're not going to be able to see anybody.
9. Don't get caught. If somebody kicks you pull them so that you can hide behind them and they get caught.

## HERE ARE SOME PLACES TO AVOID:

1. Never hide behind a pole because it's too skinny.
2. Never hide behind a fire hydrant because it's too short.
3. Never hide behind the person who's counting because they might look back and see you.
4. To avoid being it, keep an eye on the seeker and make sure they don't see you.
5. The best places to hide are up a ladder and up a tree.

Good luck!

Sincerely,

Ehmely
