How Dinosaurs Went Extinct

by Charlie, 826michigan

TYPE
INFORMATIONAL
NARRATIVE

The Earth grew angry with the dinosaurs because they had been around for eons and refused to leave for the history books, where all creatures went the Earth said so. The Earth sent meteorites, volcanic eruptions, and smoke that blocked out the sun and killed the plants, until the dinosaurs were forced into the history books, leaving the bones of those who had died in the catastrophes behind. That is how the dinosaurs went extinct.
