

# Let's Build Functions

We have these five basic graphics functions to start with:

**DrawDot**

**DrawLine**

**DrawTriangle**

**DrawRectangle**

**DrawCurve**

What is a slightly more complicated function that you could make? Give it a name!

---

---

Write out some pseudocode for the new function here, based on the functions you have available.

---

---

---

---

---

Sketch the result of your new function here.

---

# Let's Build Functions

**You and your fellow classmates have created even more functions to use!**

What is a slightly more complicated function that you could make? Give it a name!

---

---

Write out some pseudocode for the new function here, based on the functions you have available.

---

---

---

---

---

---

Sketch the result of your new function here.
