

## **Community Issues**

Choose either your school community (where you learn) or your neighborhood community (where you live). Are there any issues affecting everyone in that community that you think need to be solved? Try to think of at least 3 issues, and write your ideas in the appropriate column below.

School	Neighborhood

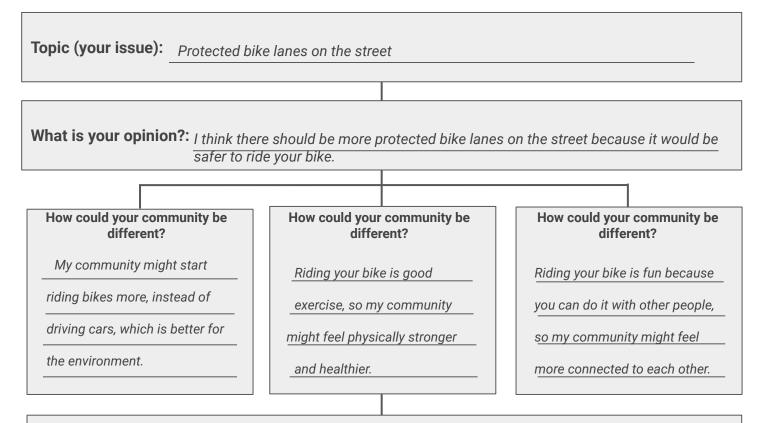

## Imagine a World

Draw a picture below that shows 1-3 ways your community would be different without the issue you identified. After you draw your picture, write a summary about what you drew.

## **Outline Example**

Create an organizational structure that groups all of the ideas you've already brainstormed together in a logical way.

Brainstorm the steps you could take next, turning your opinion into action.

To turn my opinion into action, I could figure out who is in charge of making changes to the streets in my city.

If I can't find the answer to that question on my own, I could ask a teacher or a family member to help. Once I

figure out who makes those decisions for my city, I could write them a letter. My letter could share my opinion

and all of the reasons why I think my community would be better if we had more bike lanes in the streets.

## Outline

Create an organizational structure that groups all of the ideas you've already brainstormed together in a logical way.

Topic (your issue):				
What is your opinion?:				
How could your community be	How could you	r community be	How could your community be	
different?	How could your community be different? How could your communid different?		different?	
	nat's next? Brains	storm your next step	DS.
