

Scavenger Hunt

Follow the prompts below to complete the scavenger hunt. Draw a simple picture of each type of item you find. Then, count the item, write how many of each item you found, and label the number. There is an example below. The last 2 rows of the chart are left blank, for you to fill in on your own!

Find things...	Draw a simple picture of the thing you found	Write how many of that thing you found and label the number
<i>Example: that are green</i>		<i>22 leaves</i>
in the sky		
that are colorful		
with legs		

Scavenger Hunt Reflection

Follow the prompts below to complete the scavenger hunt. Draw a simple picture of each type of item you find. Then, count the item, write how many of each item you found, and label the number. There is an example below. The last 2 rows of the chart are left blank, for you to fill in on your own!

1. What item did you count the most of?

2. What item did you count the least of?

3. Were you surprised by anything that you counted? What was surprising?

4. What were the 3 most interesting items you counted? List them below.

Scrapbook Page Example

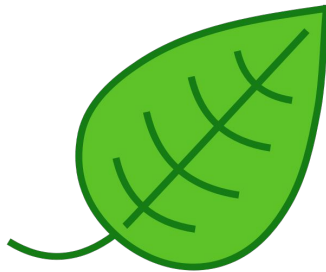

Below is an example of how to fill out your scrapbook page.

How many of this item did you count, and where did you find it?

I counted 22 leaves. All 22 leaves I counted were on one branch of a tree.

What do I already know about this item?

Leaves are an important part of a plant. They come in a variety of shapes, sizes, and colors. Ginkgo leaves and oak tree leaves are easy to identify.

leaves

What is one question you have about this item?

I noticed that leaves have thin veins on their surface. Why do leaves have veins, and what do those veins do?

What is the answer to your question?

Veins inside a leaf work a lot like the veins inside of me! A leaf's veins help carry water and nutrients throughout the plant. Veins also support the weight of the leaf to make it durable.

Scrapbook Page

Draw a picture of your interesting item in the center of the page. Develop your topic by listing any facts, details, or definitions you already know about your item. Think of a question you have about the item you found. Research the answer to your question and write down your findings on the page. Repeat this process for all of your items. If you need more space to write, continue in your writing journal.
