GRADE 5

For anyone going to fifth grade, remember to have fun. Well, there are steps to having fun:

1. Listen to teachers and sometimes friends if they are right.
2. Make new friends. It’s fun; I made a lot of new friends.
3. I know some people will disagree with this: stay real, even with the drama.
4. This has to do with number three: don’t get in the drama.
5. Learn things before you go to school. When I went to third grade I already knew multiplication.
6. Now we are at the end; this is when the trouble starts. You’re going to think, “Oh, I can slack, because school’s almost over.” It’s the opposite. You have to work harder since tests are coming.
7. You’ve been studying like crazy. Take a break. Calm down. Like, “Omg, you so cray-cray.”
8. You’re almost done and tests are wrapping up, like, “Thank you, god.”

9. Tests are done. Have fun. Go hang out.

10. School’s over, graduation! Go to a party. l know l did.
